

Vox Pupuli - The Importance of Working Together

Vox Pupuli

What is Vox Pupuli?

- Collective of Puppet module, tooling and documentation authors
- Provide a home for orphaned Puppet modules (and tools)
- Maintains many modules
- Be helpful and excellent to each other

@moduletux for @voxpupuliorg

Vox Pupuli

What is Vox Pupuli?

- No relation to Puppet, Inc
- Work and Develop at our own pace.
- Be helpful and excellent to each other.
- All community members are welcome.

@moduletux for @voxpupuliorg

Vox Pupuli

Who is Vox Pupuli?

- ~105 Volunteers
- Developers
- Systems Admins
- Many other non-coders
- Contributors new to Git

@moduletux for @voxpupuliorg

Vox Pupuli

Who is Vox Pupuli?

- Merge access to 132 repositories that are a mix of:
 - Puppet modules
 - Puppet-Lint checks
 - Other Ruby Gems
 - Python based API-client and Dashboard

@moduletux for @voxpupuliorg

Vox Pupuli

Who is Vox Pupuli?

- 100% volunteers
- A few people work for Puppet, Inc.
- Most of the contributors participate in their free time.
- Focus on ensuring our Users can continue to rely on our software.

@moduletux for @voxpupuliorg

Vox Pupuli

Why is Vox Pupuli?

- Maintaining software is difficult
- Modules are no different.
- Ensuring quality is a never-ending race against bit-rot.
- The ruby ecosystem evolves quickly and can be difficult to keep up with best practices.

@moduletux for @voxpupuli.org

Vox Pupuli

Why is Vox Pupuli?

- Trying to do all this alone is exhausting (at best).
- Sickness, changing jobs, losing interest, or simply life can interfere.
- We forget that sometimes we can be a single point of failure.

@moduletux for @voxpupuli.org

Vox Pupuli

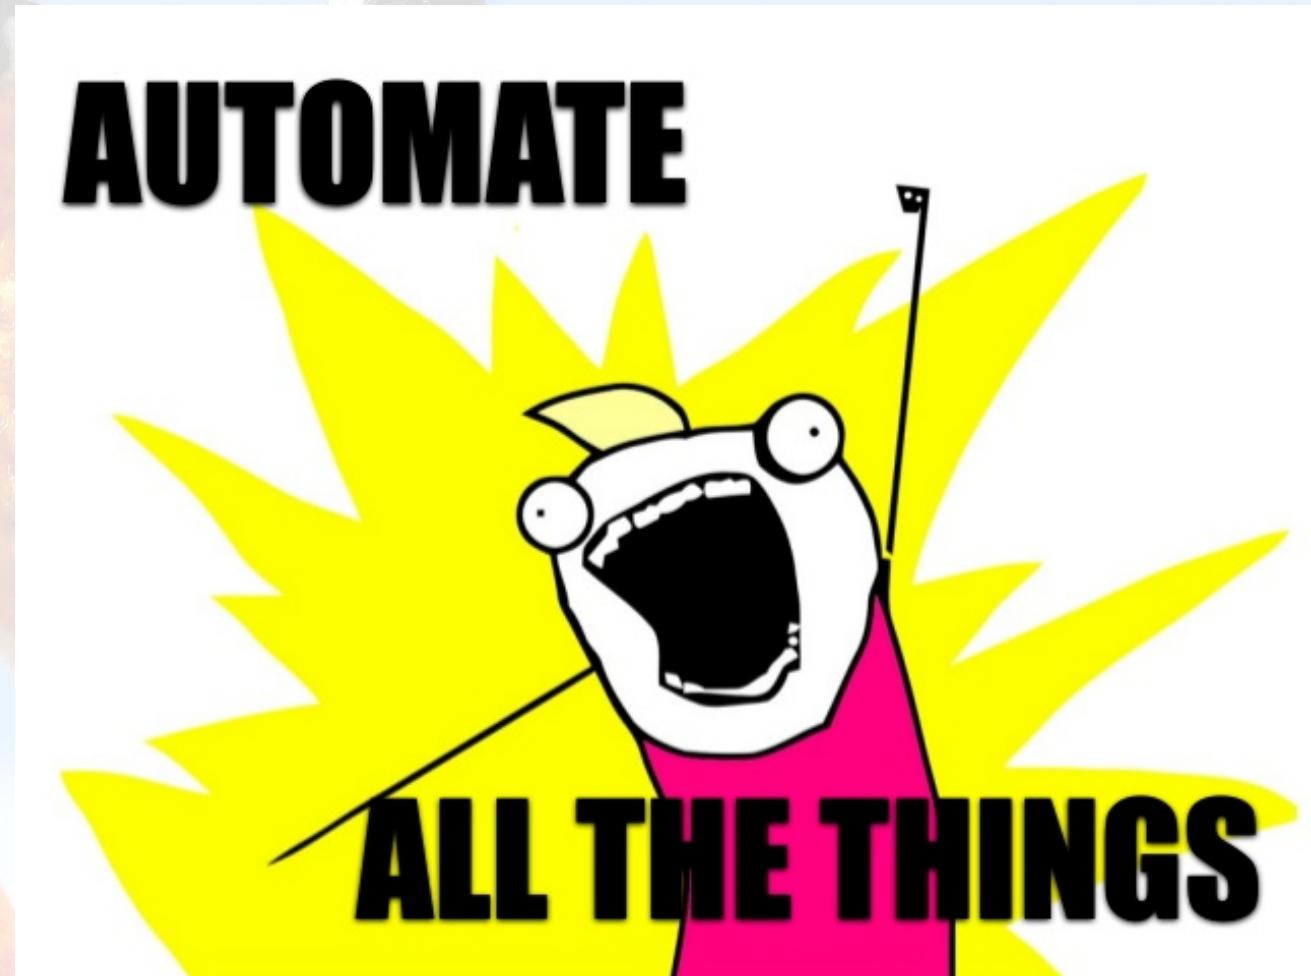

Why is Vox Pupuli?

- Puppet modules can be tiny, but still require a *lot* of attention/time
- Many Puppet modules can add up over time.
- Having 100+ other people around has helped eliminate the single point of failure of the maintainer.

@moduletux for @voxpupuli.org

Vox Pupuli

How?

@moduletux for @voxpupuli.org

Vox Pupuli

How?

Automation:

modulesync

- We are managing 85 modules.
- Created by Puppet, Inc and handed to Vox Pupuli.
- Tool for templating and standardizing config files across multiple git repos.
- Anybody can start it and submit a PR.

@moduletux for @voxpupuliorg

Vox Pupuli

How?

Automation:

Travis/Rleases

- We use Travis for our test and release automation.
- rspec-puppet runs tests against common Puppet/Ruby versions on each PR.
- Built our own release gem - `voxpupuli-release` - made releases easy for anyone perform.
- Travis + Release Gem releases to Puppet Forge and RubyGems.

@moduletux for @voxpupuliorg

Vox Pupuli

How?

People:

Contributors

- Anyone who submits bug reports, feature requests, pull requests....
- Provide feedback on irc and slack

@moduletux for @voxpupuliorg

Vox Pupuli

How?

People:

Collaborators

- Review and Merge Pull Requests.
- Trigger Automated Releases.
- Assist Users with Git.
- Provide communication for their projects of responsibility.
- and explain why we don't support Puppet 3, Ruby 1.8.7, 1.9.3, or 2.0.0 anymore.

@moduletux for @voxpupuliorg

Vox Pupuli

How?

People:

Project
Management
Committee

- 5 Members, elected yearly.
- Approve Governance changes
- Enforce the Code of Conduct.
- Make decisions when Community consensus can't be reached.
- No specific chairperson or roles.
- PMC guidelines are created by the community
<https://tinyurl.com/voxpupuli-governance-md>

@moduletux for @voxpupuliorg

Vox Pupuli

What does
Vox
Pupuli do?

-for me?
-for my organization?

@moduletux for @voxpupuliorg

Vox Pupuli

What does Vox Pupuli do?

- Modules released frequently and held to high standards.
- Compatible with all *supported* versions of Puppet.
- Always glad to provide help for Puppet/Ruby.
- Migrate a module or gem to us!

@moduletux for @voxpupuliorg

Vox Pupuli

Working Together

"What if I don't use Puppet?"

- Everything we use or produce is freely available!
- Steal our process/Tools!

@moduletux for @voxpupuliorg
